(54) Title: MULTI-PURPOSE COOLER

(57) Abstract: The cooler (100) apparatus can include a main body (105) having a base and sidewalls and a storage cavity defined in the main body and having an open end. The cooler apparatus can further include a lid (104) coupled to the main body and movable with respect to the main body between a first position in which the lid substantially covers the open end of the storage cavity and a second position in which the lid does not substantially cover the storage cavity. The lid can be positioned substantially horizontally in movement between the first and second position.
